

Multitank is the ideal container for packing, storing and carrying gherkins.

Designed especially for this sector, combines many different features, improving safety, traceability and quality.

Tested in the demanding environment of India and Canada. The one way gas valve ensure safety in transportation.

Multitank use, is more economical than single use plastic drums, ensuring the environmental profile by reducing CO₂ emissions.

4 x way entry Integrated pallet

800 x 600 mm, FDA – BRC standard

One Way Gas Valve *

Remove fermentation gas – works in 0,3 psi
* Optional

Main & Round Anti – Levitation Nets

Keep peppers under the brine, pressed by Main Lid under rims

Easy Access when stacked full

Round Lid positioned in the side allowing access to the content, for samples, and quality control.

Up drained Hole 2” threat with filter modification *

Allow brine drain, keep peppers inside.

* Optional

Safety Seals - Traceability

3 x security points for all lids

4 x Label places

1 x RFID tag

Logo personalization

Counting or code embedded printing

Personalize color

Load up to 15% more Net Drained Weight In 40' Ctr and Trucks

2 x Multitank in dynamic stacking allowing two levels of loading in truck or Ctr

Packaging Savings up to 50%

Multitank has the highest return ratio 6:1
6 x Full loadings return in 1 x Empty
It is economical to return back the empty ones and reuse it for many times.

Save up to 75% storage space

3 x Multitank in static stacking allowing reducing the required storage space.
Nesting empty Multitank.

Save incredible amounts of CO₂ emissions

You can achieve your sustainability goals and improve the environmental profile.

Cost Saving

- Quality Control Time
- Handling Time
- Loading time for ready products
- Unloading Time for packaging material

Long Term Asset

- 2 years Guaranty
- Minimum 7 years life time
- Asset Depreciation
- ISTA Transport Certification
